Professional Summary

Computer Science Engineering undergraduate with hands-on experience developing full-stack and AI-powered applications. Skilled in C++, Java, Python, JavaScript, React.js, Node.js, Express.js, REST APIs, MySQL, MongoDB, Machine Learning, LLMs, Prompt Engineering, and Retrieval-Augmented Generation (RAG). Experienced in software development, API integration, database management, authentication, testing and debugging.

Professional Experience

Tata Steel Ltd. (Shavak Nanavati Technical Institute) **05/2026 – 06/2026**
Web Development Trainee

- Built a digital products marketplace using React, Node.js, Express.js, MongoDB, and Razorpay, implementing order processing and server-side payment signature verification to reject invalid payments.
- Developed product management features for creating, editing, deleting, and publicly listing products, with unique slug-based URLs and ownership checks.
- Developed AI-powered sales insights to summarize creators' order data and generate charts.
- Implemented Google login with server-side token verification and cookie-based sessions to protect creator and admin pages.
- Integrated Nodemailer to send payment confirmation emails to customers and creators after successful transactions.

Techno Exponent **06/2026 – 07/2026**
Full Stack Web Development with AI-Integration Intern

- Built a doctor appointment booking platform using React.js, Node.js, Express.js, and MongoDB, with patient, doctor, and admin dashboards.
- Developed secure REST APIs with JWT authentication and role-based access for patients, doctors, and admins.
- Developed and optimized **5+ full-stack features** using React.js, Node.js, Express.js, and REST APIs (role-based dashboards, doctor search and filtering, appointment booking and management, admin controls, AI-powered doctor recommendations, appointment status tracking), improving application functionality and performance.
- Integrated AI features to assist patients in finding the right doctor and booking faster.

Projects

AI Interview Platform – InterviewIQ.AI *React.js, Node.js, LLMs, Prompt Engineering, STT, TTS*

- Built a full-stack AI mock interview platform using React.js and Node.js to generate personalized technical and behavioral questions from role, experience, and parsed resume data.
- Developed an LLM-based scoring engine using prompt engineering to evaluate responses for correctness, communication, and confidence, providing structured feedback and downloadable PDF performance reports.
- Implemented voice-based interviews with an AI avatar (STT/TTS), per-question timers, JWT authentication, and Razorpay payments, with server-side validation of timers, credits, and payment signatures.

AI-Powered React UI Library *React.js, Node.js, OpenRouter, JWT, Razorpay, NPM*

- Built and published a reusable React component library (20+ components) to NPM with prop-driven, customizable defaults, installable by any developer via npm install.
- Integrated OpenRouter LLM API to turn natural-language prompts into React components, using structured system prompts, few-shot examples, and JSON-constrained output, with a live preview using react-live.
- Automated the release pipeline (write component, build, npm publish) from a single action, and implemented Google OAuth, JWT authentication, role-based user/admin roles, and a credit-based Razorpay payment system with server-side verification.
- Implemented Google OAuth, JWT authentication, Role-Based Access Control (RBAC), automated NPM publishing, and Razorpay credit-based payments with HMAC-SHA256 server-side verification.

AI Website Builder – GenWeb.ai *React.js, Node.js, Express.js, MongoDB, OpenRouter, DeepSeek*

- Built a full-stack AI website builder that turns natural-language prompts into complete responsive websites, with a live editor, code view, and preview.
- Integrated OpenRouter and DeepSeek LLMs for iterative code editing, with a structured system prompt and defensive JSON parsing and retry logic for reliable output.
- Implemented Google Sign-In with Firebase Authentication, JWT sessions for API access, REST APIs, credit-based usage, and Razorpay payment integration.

Technical Skills

Languages: C++, Python, Java, JavaScript
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Vite
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL, SQL, Redis
AI/ML: Machine Learning, Scikit-learn, NumPy, Pandas, LLMs, Generative AI, RAG, Prompt Engineering

Cloud & Tools: AWS, Linux, Docker, Git, GitHub, Postman, NPM, Razorpay
CI/CD & DevOps: Jenkins, CI/CD
Core Subjects: Data Structures and Algorithms, OOP (Object-Oriented Programming), DBMS, Operating Systems, Computer Networks, SDLC, Agile

Education

Heritage Institute of Technology **Year of Passing: 2027**
B.Tech – Computer Science and Engineering *CGPA: 7.88/10 through 6th Semester*
University Name: Maulana Abul Kalam Azad University of Technology (MAKAUT) *Course Type:* Full Time

Dabcha Nabakola High School (H.S.) **Year of Passing: 2022**
Higher Secondary – West Bengal Council of Higher Secondary Education (WBCHSE) *81.4%*
Course Type: Full Time

Dabcha Nabakola High School (H.S.) **Year of Passing: 2020**
Madhyamik – West Bengal Board of Secondary Education (WBBSE) *88.71%*
Course Type: Full Time

Certifications

- **AWS Academy Graduate – Cloud Foundations** – Amazon Web Services (AWS), May 2026
- **Artificial Intelligence and Machine Learning** – Internshala
- **Generative AI** – Internshala
- **Full Stack Web Development with AI** – Internshala

Achievements

- Solved **250+ LeetCode problems**, demonstrating strong problem-solving and Data Structures & Algorithms proficiency.
- Published a reusable **React component library as an NPM package**, demonstrating practical software development experience.
- Participated in **technical hackathons** focused on developing innovative software solutions and applying technical skills to real-world problems.
